HIGHLIGHTS

- Saved $30,000 annually and enhanced customer satisfaction, showcasing your ability to drive financial and operational improvements through data-driven insights.
- Increased regional uptime by 10% and achieved a 22% improvement in infrastructure performance through advanced statistical analysis and proactive trend monitoring
- Streamlined data integration and accessibility, enabling robust business intelligence and analytics capabilities that drive strategic decision-making
- Enhanced patient outcomes and achieved substantial cost savings, demonstrating a direct link between data analysis and improved healthcare efficiency.

SKILLS

- **Languages**: Python, SQL, Bash Scripting,
- **Database Management:** MySQL, PostgreSQL, Microsoft SQL Server
- **CI/CD**: Git, GitHub
- **Cloud**: Microsoft Fabric, Azure Data Factory, Azure Synapse Analytic, HubSpot
- **Data Visualization and BI tools:** Microsoft Power BI, Microsoft Excel, Google Sheet, Looker Studio
- **Soft Skills:** Exceptional Analytical and Problem-Solving skills | Advance Communication and Presentation Abilities | Proven independent and Collaborative work ethic | Strong Project Management Capabilities.

EXPERIENCE

ANALYTICAL ENGINEER,

Mint Group, South Africa   Nov 2023 - Present

- Developed a high-performance data pipeline handling over 200 million rows, streamlining data extraction, transformation, and loading processes to a centralized data lake.
- Optimized sophisticated data models that enhanced business intelligence and analytics capabilities, resulting in actionable insights and improved strategic decision-making
- Collaborated with stakeholders and cross-functional teams to accurately capture data requirements, ensuring data integrity and consistency across diverse departments.
- Improved data pipeline performance and scalability through proactive monitoring and optimization, while rigorously adhering to data governance, security policies, and best practices.

DATA ANALYST,

Lafayette Health County, United States of America   May 2023 – Jul 2023

- Reduce illness by 25% by identifying high-risk patients of 700+ records with SQL and Power Bi, leading to improved preventative care and significant cost savings.
- Increased best practice adherence by 12%, presenting meaningful insightful Power Bi visuals showing achievements, best practices and recommendation for mental health patients.
- Saved health cost by 15%, through analyzing and highlighting high spending claim with SQL, consolidating this high claim with multiple similar activities that reduced expenses on individual claims.
- Communicated result and findings through weekly report, and dashboards to help make more informed decisions.

SENIOR DATA ANALYST,

IHS Towers Limited, Nigeria   Feb 2020 – Mar 2023

- Increased uptime by 22%. 10% infrastructural upgrade through statistical and proactive failure trend tracking.
- Boosted KPI performance by 18. Defined KPI for underperforming sectors using SQL queries resulting in a $90,000+ annual revenue reduction in operational cost.
- Enhanced Reporting, Conceptualized and built an automated monthly dashboard in Excel and Microsoft Power BI to monitor regional sector performance to stakeholders and client for insightful decision making.
- Conducted root cause analysis with historical data to identify, eliminate and improve underlying issues impacting network performance and reliability.

SENIOR DATA ANALYST,

IHS Towers Limited, Nigeria   Feb 2020 – Mar 2023

- Revenue Growth by 8%. Segmented poor performing units using SQL queries for service upgrade/decommissioning leading to 99.90% uptime and regional stability.
- Extended equipment lifespan by 45% through data- driven predictive maintenance, resulting in $30,000 annual cost savings
- Maintained Continuous reporting and comprehensive documentation for data analysis processes, methodologies and finding for every stage of implementation.
